

Frequently Asked Questions

Can you take the photos for me?

Yes. At your request I can photograph your location for a fee of \$100 within the Seattle / Bellevue area.

Do I take digital or film photos?

A digital camera is ideal, but a film camera will also work. If you use film, have the photos burned to a CD at your local drug or camera store.

How many pictures should I take?

Every location is different. For example, a small bungalow might be well represented by 20 pictures whereas a mansion might require 100 pictures.

What if I don't have a wide-angle lens?

First, try to stand back to get the widest shot. If that doesn't work or the room or yard is too large, try this: Stand with a clear view of the entire area and take a series of 2-3 pictures starting from LEFT to RIGHT. Overlap the pictures slightly to give a continuous view of the area. Then stand on the opposite side of the same area and shoot another series of 2-3 shots.

Will my address be available to the public?

No, definitely not. The property address and all personal information is kept strictly confidential. If your property matches a client request, I will contact you for approval before sharing the property location.
